

Package ‘parqr’

October 14, 2022

Type Package

Title Read in Multi-Part Parquet Files

Version 0.1.0

Description Reads in multi-part parquet files. Will read in parquet files that have not been previously coalesced into one file. Convenient for reading in moderately sized, but split files.

--------------	----------

parquet_readr *Read a multi-part parquet file in as a data.frame*

Description

Read a multi-part parquet file in as a data.frame

Usage

```
parquet_readr(path, verbose = FALSE)
```

Arguments

path The path to the directory where the file is stored.
 verbose Used for debugging the path string.

Value

A single dataframe of your multi-part parquet.

Examples

```
## Not run:
# parquet_readr(path=path/to/your/parquet.parquet)

## End(Not run)
```

parquet_readr_list *parquet_readr_list*

Description

parquet_readr_list

Usage

```
parquet_readr_list(path, verbose = FALSE)
```

Arguments

path The path to the directory where the file is stored.
 verbose For debugging the path string.

Value

A list of dataframes.

Examples

```
## Not run:  
# parquet_readr_list(path=path/to/your/parquet.parquet)  
  
## End(Not run)
```
